

Dear Parent/Guardian,

As part of Lake High School's graduation requirements, the students have community service hours to fulfill. To assist them and our students here at Lake Elementary, we have teamed up to create a mentoring program. We feel that your child, _____, would benefit from this opportunity.

The students will come cover once a week (depending on need) in order to help the students with organization, schoolwork, and/or minor social matters (also depending on need). The meetings will be during the school day and they will be supervised. The mentors will speak with the students and motivate them to do their best in school. They will also encourage involvement in extracurricular activities, which might interest them. The high school volunteer coordinator and myself have approved the high school students in order to mentor our students.

Do you give your child permission to participate in this program?

_____ Yes

_____ No
