

Lake Local School District is introducing a new transportation APP available from Apple/Android store. This app will allow you to track the bus to see how far it is from your stop and give you an approximate time for arrival.

Here is all you need to do:

- **Go to APP store and download the VERSATRANS MYSTOP APP** (available at the Apple/Andriod store)
- Pick your school in the drop down box (LAKE LOCAL)
- Your username and password is your students ID number
- Click login, and it will take you to your student information, and let you know how far your bus is from you stop location

Please note that the bus has to be running the actual bus route in order to track your student's bus.

If you have any questions, please call Lauri Livingston at 330-877-4275.
